E coli colonies per 100 ml in Avon Hall pond. Maximum per DEQ standard is 120 for recreational use. For more information about Avon Hall Pond restoration see www.rappflow.org

Note: Geese left the pond in August 2014 and were not observed as of the date of these data in September 2014.

Colonies were analyzed by multiple methods: Joiner labs in Warrenton; Rappahannock Water & Sewer; and coliscan by volunteers.
